Section 1:

interpret and construct pie charts and line graphs and use these to solve problems

1 This pie chart shows how the children of Class 6 travel to school.

There are 8 children that travel to school by bike.

How many children are there in Class 6?

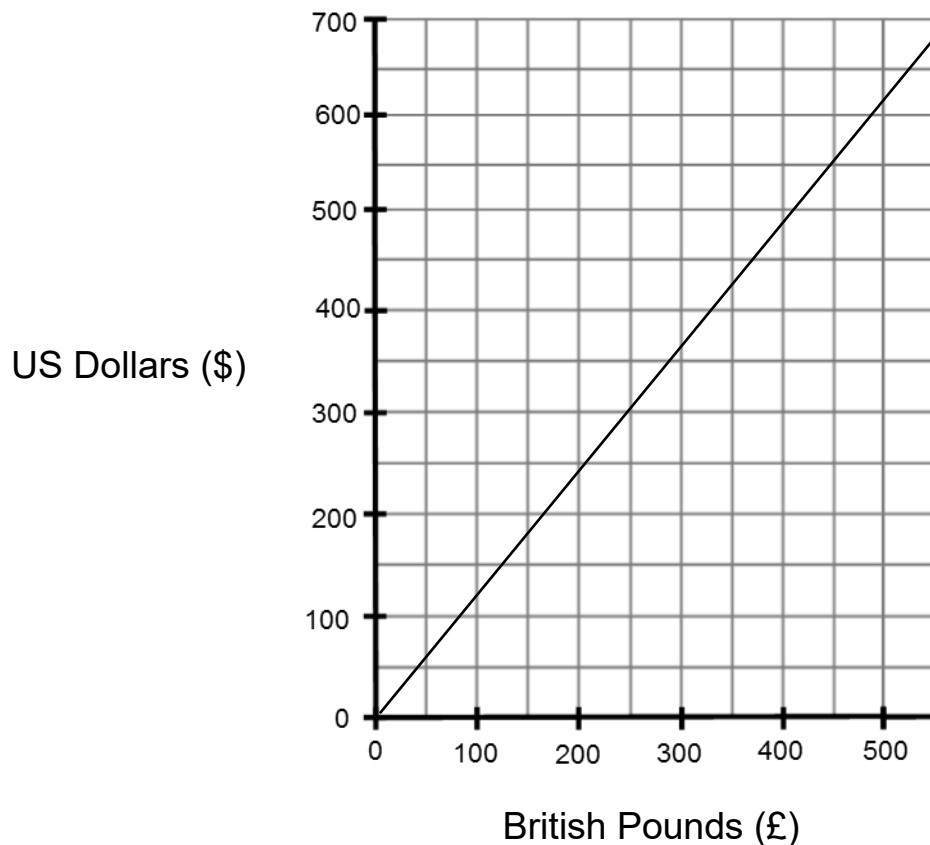

_____ 1 mark

There are 36 children at an after school club. Beth is making a pie chart to show the proportion of boys and girls. There are 20 girls at the club.

Calculate the angle for **boys** in her pie chart.

_____ 1 mark

2 This graph converts British Pounds (£) to United States Dollars (\$).

Approximately how many Dollars (\$) would you get for £200?

_____ 1 mark

Approximately how many Pounds (£) would you get for \$100?

_____ 1 mark

The Jones family went on holiday to America.

They exchanged £500 into Dollars before the left.

When they returned they had \$150 remaining.

Approximately how many Dollars did they spend while in America?

_____ 1 mark

- 3 These pie charts show the results of a school's football and netball teams in a year.

The football team drew 2 games.

How many games did the football time **win**?

1 mark

Which team lost more games? Explain how you know.

1 mark

4

Zac and his family went for a walk. The graph shows the distance they travelled. They set off at 12:15pm.

What was the time when Zac had walked 5 km?

_____ 1 mark

At what time did Zac take a break?

_____ 1 mark

How long did the break last?

_____ 1 mark

Estimate how far he had walked by 3.15pm.

_____ 1 mark

Section 2:**calculate and interpret the mean as an average**

5 Marcus threw a tennis ball 3 times.

He measured the distance and rounded to the nearest metre.

	Throw 1	Throw 2	Throw 3
Distance (metres)	12	15	12

What was the mean average distance he threw?

m
